CSCI390 Web Programming

Prepared by:
Yara Janbein
Slaimen Krayem

Abstract

- MindoLearn Dashboard is a multi-page front-end web application built with React.js and React Router DOM, converting the original static HTML/CSS dashboard into a fully component-based, routed React application.
- The application features a persistent top NavBar component with the project logo, a search box, a user profile section, and navigation links to all pages using React Router's Link component.
- The Home page includes a welcome banner with three statistics cards, two horizontal Continue Learning course cards, and two vertical course grids for Marketing and Math — rendered dynamically using `.map()`.
- The Contact Us page contains a controlled form built with `useState` and a `handleChange` handler, allowing users to submit their name, email, and message.
- The Help Center provides a searchable set of help topic cards using `useState`. The About Us page presents the platform mission alongside four feature cards.
- The project is structured following the professor's guidelines: `create-react-app` for scaffolding, separate `components/`, `pages/`, and `styles/` folders, with one `.js` and one `.css` file per component

Technologies used:

Technology	Version	Purpose
React.js	v19	UI component library
React Router DOM	v7	Client-side routing
Create React App	v5	Project scaffolding and build
CSS3	—	Component-scoped stylesheets
JavaScript ES6+	—	Logic, state, array methods
Node.js / npm	v14+	Runtime and package management
HTML5 / JSX	—	Markup structure
AI-generated images	—	Course thumbnail visuals (Google)

Key React Concepts Applied

- Functional Components — Every component is a JavaScript function that returns JSX.
- Props — Data passed from parent App.js to child components.
- useState Hook — Used in Contact.js and Help.js for controlled inputs.
- React Router — BrowserRouter, Routes, Route, and Link for navigation.
- CSS Modules — Each component imports its own dedicated CSS file.

Codes:

For home page

```
import React from 'react';
import '../styles/Home.css';

const marketingCourses = [
  { img: '/digital-marketing-concept.webp', alt: 'Digital Marketing', name: 'Digital Marketing', author: 'George Karouni', rating: '4.4', students: '9,658', hours: '140' },
  { img: '/marketing-la-gi-1.jpg', alt: 'Intro to Marketing', name: 'Intro to Marketing', author: 'George Karouni', rating: '4.9', students: '22,684', hours: '80' },
  { img: '/social-media-marketing.png', alt: 'Social Media Marketing', name: 'Social Media Marketing', author: 'Tarek Hashem', rating: '4.5', students: '6,108', hours: '67' },
  { img: '/diferencias-entre-seo-y-sem-destacada.jpg', alt: 'SEO & SEM', name: 'SEO & SEM', author: 'Soha Tahan', rating: '4.1', students: '5,237', hours: '40' },
];

const mathCourses = [
  { img: '/calculus-1.jpg', alt: 'Calculus 1', name: 'Calculus 1', author: 'Ragheb Mghamas', rating: '4.4', students: '10,552', hours: '60' },
  { img: '/calculus-1.jpg', alt: 'Calculus 2', name: 'Calculus 2', author: 'Ragheb Mghamas', rating: '4.8', students: '14,620', hours: '70' },
  { img: '/linear-algebra.jpg', alt: 'Linear Algebra', name: 'Linear Algebra', author: 'Ragheb Mghamas', rating: '4.7', students: '21,459', hours: '45' },
  { img: '/Gemini_Generated_Image_w0mu3zw0mu3zw0mu.png', alt: 'Numerical Mathematics', name: 'Numerical Mathematics (+lab)', author: 'Ragheb Mghamas', rating: '4.4', students: '16,384', hours: '70' },
];

const Home = () => {
